Dobbelstenen <-> Database

database server

MySQL

worp (string)

score (string)

user id

time stamp

- 1) Tabel aanmaken
- 2) Connectie met database
- 3) Insert Into
- 4) Fetch results

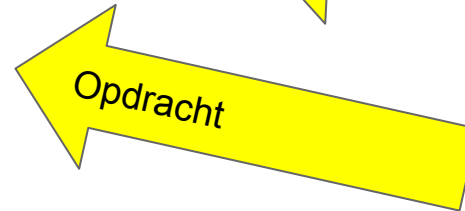

Dobbelstenen <-> Database

- 1) Tabel aanmaken
- 2) Connectie met database
- 3) Insert Into
- 4) Fetch results

- 1) Code ontwikkelen apart van dobbelstenen
 - Debuggen / testen eenvoudiger

- 2) Koppeling met dobbelsteen

Db connect

```
<?php
```

```
const DB_HOST = 'localhost';
```

```
const DB_USER = 'root';
```

```
const DB_PASS = '';
```

```
const DB_NAME = 'poker';
```

```
?>
```
